

Car Dealership CRM - Core Functions

Developer-ready functional scope

Core CRM Function	Access & What It Will Do
Lead Management	Capture and manage leads from Tele-in, Walk-in, Website, Facebook, Google, IndiaMART, Justdial, CarWale, CarDekho and other sources. Track lead source, status, assigned consultant, follow-up date, enquiry model and complete activity history.
IVR Call Recording - CallerDesk	Integrate CallerDesk IVR for inbound and outbound calls. Store call number, consultant/user, call time, duration, recording, missed-call status and link every call to the customer profile.
SIM-Based Mobile Call Recording	Record consultant mobile SIM calls and automatically upload them to CRM. Calls should be linked to the correct lead/customer with date, time, duration, recording and AI summary.
AI Auto Calling	Automatically call new leads using AI voice. Capture customer response, qualification status, preferred model, callback time and transfer qualified leads to Telecaller or Sales Consultant.
Personal WhatsApp QR	Allow each authorised user to connect their personal/business WhatsApp through QR. They can send/receive customer messages while the CRM stores the conversation against the lead.
Official WhatsApp API	Connect official WhatsApp Business API for approved templates, automated notifications, broadcasts, drip campaigns and customer conversations.
SMS Integration	Send manual and automated SMS for enquiries, appointments, test drives, booking updates, reminders, delivery and other customer communication. All SMS activity should be logged.
Email Integration	Send quotations, brochures, follow-ups, booking information and automated emails. Track sent status and maintain email history inside the customer timeline.
Drip Campaigns	Automatically send WhatsApp, SMS and Email based on predefined schedules such as Day 1, Day 3, Day 7 or based on lead stage and customer action. Stop or change the drip when the lead status changes.
Test Drive GPS Tracking	Sales Consultant starts and ends the test drive from the mobile app. Record customer, vehicle, consultant, start/end time, GPS route, distance and duration.
Social Media Management	Manage and publish content to Facebook, Instagram, Google Business Profile, LinkedIn and X/Twitter from the CRM. Maintain post history and basic engagement information.
Google Review Management	Send review-request links to customers, track which employee sent the request, capture internal feedback and use AI to generate review text suggestions.
Customer Alerts & Reminders	Create automatic alerts for birthday, anniversary, follow-up, test drive, promised callback, booking, delivery and other custom dates. Allow reminder timing to be configured.

Core CRM Function	Access & What It Will Do
AI Image Creation	Generate dealership creatives such as offers, festival greetings, customer delivery posts, model promotions and social media images using predefined brand templates.
Competitor Comparison	Show automatic pros and cons of the selected car against competitor models. Sales Consultants can use this during customer discussions and follow-up calls.
WhatsApp Template Management	Central library for approved WhatsApp messages by category such as enquiry, follow-up, test drive, booking, finance, insurance, delivery and feedback.
AI Voice Transcript	Convert call recordings into text automatically. Show the full transcript and highlight important customer information.
AI Auto-Fill CRM Fields	Use call transcript/AI summary to suggest updates such as interested model, variant, budget, purchase timeline, exchange requirement, finance requirement, test-drive requirement and follow-up date. User should review before saving.
Previous Voice Quick Note	Before the next call, show the previous call summary, customer requirement, pending action and important notes so the user can continue the conversation without searching manually.
Activity Timeline	Maintain one chronological timeline of calls, recordings, WhatsApp, SMS, emails, notes, appointments, test drives, quotations, status changes, booking and department updates.
Graphical Reports & Dashboards	Provide role-based dashboards for leads, follow-ups, calls, test drives, bookings, conversion, ageing, source performance, employee performance and department status.
Lead Assignment & Reassignment	Automatically or manually assign leads based on branch, team, consultant availability, model or source. Managers can reassign leads and the system should keep assignment history.
Follow-Up Management	Create next follow-up date/time, reason, priority and reminder. Show overdue, today and upcoming follow-ups to each user.
Quotation Management	Create and store vehicle quotations with model, variant, colour, ex-showroom price, insurance, RTO, accessories, discounts and final on-road price. Maintain quotation history.
Booking Management	Record booking date, booking amount, model, variant, colour, expected delivery, payment status and booking confirmation. Trigger downstream department activities automatically.
Stock / Inventory Management	Maintain vehicle stock by model, variant, colour, VIN/chassis number, location, stock age, availability and allocation. Link allocated vehicle to customer booking.
Used Car / Exchange Management	Create exchange evaluation requests, capture old-car details, photos, RC, ownership, inspection, expected price, evaluated price, approval and final exchange status.
Finance / Loan Management	Track finance requirement, bank/NBFC, loan amount, down payment, documents, application status, sanction, rejection, disbursement and finance clearance.

Core CRM Function	Access & What It Will Do
Insurance Management	Track insurance company, quote, premium, payment, insurer selection, insurance-ready status and whether the policy has been generated.
RTO Management	Track registration documents, insurance confirmation, RTO payment, application status, registration progress and final registration number.
Accessories Management	Record customer-selected accessories, package, price, stock availability, installation status, payment and completion status.
PDI Management	Record Pre-Delivery Inspection status, checklist, issues found, rectification and final PDI approval before delivery.
Delivery Management	Track planned delivery date/time, payment clearance, finance, insurance, RTO, accessories, PDI and final handover. Delivery should only move forward when required departments are ready.
Customer Feedback Management	Create feedback tasks for post-enquiry, post-test drive, post-booking and post-delivery. Capture rating, comments, complaints and satisfaction level.
Complaint & Escalation Management	Record customer complaints, department responsible, priority, assigned employee, expected resolution date, escalation level and closure status.
Google Review Follow-Up	After positive feedback, allow the Customer Relationship Team to send a Google review request. Track sent, opened and completed status where supported.
Notification Centre	Show system notifications for new leads, overdue follow-ups, approvals, booking updates, department completion, complaints and escalations.
Role-Based Access Control	Every login should only see the modules, customers, branches and actions allowed for their role. Permissions should support View, Add, Edit, Delete, Approve and Export.
All Activity Log	Record every important action made by users, including lead edits, assignments, calls, messages, booking changes, department updates and status changes.
Audit Log	Maintain detailed audit history showing user, date/time, module, action performed, old value and new value for critical changes.
Security	Secure login, role permissions, session control, password policy, optional OTP/2FA, device tracking, failed-login monitoring and data access restrictions.
Daily Backup	Automatically back up database and important files every day. Maintain backup history and provide recovery options for authorised administrators.
Branch / Showroom Management	Support multiple showrooms/branches with separate teams, leads, stock, targets and reports while allowing management-level consolidated reporting.
User & Team Management	Create users, assign branch, role, team manager, reporting hierarchy, targets and active/inactive status.
Approval Workflow	Configure approvals for discounts, used-car valuation, special pricing, booking cancellation, stock allocation or other important dealership processes.
Custom Fields & CRM Configuration	Super Admin/CRM Admin should be able to create additional fields, dropdowns, lead stages, closure reasons, enquiry sources and mandatory-field rules without code changes.

Core CRM Function	Access & What It Will Do
API & Integration Management	Central section for configuring CallerDesk, WhatsApp, SMS, Email, lead portals, social platforms, Google services and future third-party integrations.
Data Export & Reports Download	Authorised users can export permitted reports or data to Excel/CSV/PDF based on their role and access rights.

Recommended CRM Journey: Lead -> Follow-up -> Test Drive -> Quotation -> Used Car / Finance -> Booking -> Stock -> Payment -> Insurance -> Accessories -> RTO -> PDI -> Delivery -> Customer Feedback
