

Car Dealership CRM - User Roles & Access

Developer-ready role definitions and responsibilities

Role	Access & What They Will Do
Telecaller	Access new/unassigned leads, customer basic details, calling, call recording, WhatsApp/SMS/email, follow-up tasks and lead status. They will contact fresh leads, qualify customers, update notes, schedule showroom visits/test drives and assign or transfer leads to Sales Consultants.
Sales Consultant	Access assigned leads, customer profile, previous call notes, AI transcript, WhatsApp, SMS, email, quotations, test drives, used-car requests, finance requests, booking and activity timeline. They will manage the customer from enquiry to booking and coordinate with all departments until delivery.
Team Manager	Access all leads and consultants under their team, team performance, pending follow-ups, call reports, test drives, bookings and escalations. They will monitor consultants, assign/reassign leads, approve required actions and ensure follow-ups are completed.
Showroom Manager	Access complete showroom data including leads, bookings, stock, finance, insurance, RTO, accessories, delivery and staff performance. They will manage overall showroom operations, pending cases, targets and department coordination.
GM / Sales Head	Access all showroom sales dashboards, targets, conversions, enquiry sources, team performance, booking pipeline, ageing and department status. They will monitor overall sales performance, compare branches/teams and take management-level decisions.
Business Owner	Access high-level business dashboards, all showroom performance, sales conversion, revenue-related reports, stock status, department performance and audit reports. They will mainly monitor overall business health and management KPIs.
Stock / Inventory Team	Access vehicle stock, model, variant, colour, VIN/chassis number, yard location, availability, allocation and incoming stock. They will maintain stock records, allocate vehicles to bookings and update stock readiness.
Used Car / Exchange Team	Access exchange requests, old-car details, ownership, RC, photos, inspection details, expected price, evaluated price and approval status. They will inspect customer vehicles, provide valuation, get approval and update whether exchange is accepted or rejected.
Finance / Loan Team	Access customers requiring finance, loan documents, bank/NBFC details, loan amount, down payment, tenure, EMI, interest, approval and disbursement status. They will collect documents, submit loan applications, track approval and confirm finance clearance.
Insurance Team	Access booked customer and vehicle details, insurance company, premium, quotation, payment status and policy generation status. They will prepare insurance, confirm payment and mark whether the policy is generated and ready for RTO.
RTO Team	Access customer documents, vehicle details, insurance policy, registration fees, application details and RTO status. They will process registration, update application progress and enter the final registration number once generated.
Accessories Team	Access booked vehicle, customer-selected accessories, package details, pricing, stock and installation status. They will arrange required accessories, complete installation and mark accessories ready for delivery.

Role	Access & What They Will Do
Delivery Coordinator	Access booking, payment, stock, insurance, RTO, accessories, PDI and delivery details. They will check whether every department has completed its work, schedule delivery and close the final vehicle handover.
Customer Relationship / Feedback Team	Access post-enquiry and post-delivery customer lists, feedback forms, call history, ratings, complaints and escalation options. They will call customers for enquiry feedback, test-drive feedback, delivery satisfaction, complaints and Google review requests.
CRM Admin	Access lead sources, stages, mandatory fields, templates, drip campaigns, alerts, user mapping and reports configuration. They will manage day-to-day CRM settings and operational configurations without full system-level control.
Super Admin	Full access to all modules, users, roles, branches, permissions, integrations, security, backup, audit log, templates and automation settings. They will configure and control the complete CRM system.
